PROFILE

I solve problems in creative ways. At @LNCT BHOPAL where I am completing my senior year in the College of Engineering, I have learned the importance of applying classical strategies to modern-day projects.

Concentrations in computer science engineering provide a broad knowledge of engineering concepts Participated in several coding contests including the smart India hackathon

Experience at various boot camps and smart India hackathons I have Developed an AI named FLUX and cloned various popular websites including Hotstar, Netflix, etc

Passion for innovation, prototyping, and high-quality programming

I can program in multiple languages including

1. HTML

2 CSS

3 Bootstrap

4 Python

5 C

6 C++

7 PHP

8...

9...

10...

I speak fluently in multiple languages including English, Hindi, and Urdu, And know around 10 words in French and Korean.

I grab the attention of my audience and can convey any message effectively.

My Presentation Skills are excellent.

My team Was selected for the internal Smart India hackathon while I was in my first year of college.
